PROGRAM DESCRIPTIONS

2011

HEALTH ENHANCEMENT AND SAFETY DIVISION

Health Enhancement and Safety Division

HEALTH ENHANCEMENT AND SAFETY DIVISION

VISION STATEMENT

To encourage the development of coordinated school health education programs that are designed to prevent major health problems and health-risk behaviors among youth and promote healthy lifestyles, families and communities.

State and national studies show that many Montana school-aged youth engage in behaviors that put them at risk for injuries, HIV/sexually transmitted diseases, unwanted pregnancies, drug and alcohol abuse, car crashes and suicide. Additionally, health risk behaviors – such as tobacco use, improper diets, and physical inactivity – developed during childhood place young people at risk for chronic disease later in life.

The Health Enhancement and Safety Division plays a key role in fostering and maintaining the physical, emotional, social and mental health of students and their environment while promoting healthy lifestyles as personal and societal responsibilities. The three units within the Division – Coordinated School Health Unit, School Nutrition Unit, and Traffic Education Unit – include the following programs and areas of responsibility: Health Enhancement (Health and Physical Education), HIV/STD Education, Safe and Drug-Free Schools and Communities, 21st Century Community Learning Centers, School Nutrition Programs (School Lunch, School Breakfast, Milk, After School Snack, Summer Food, Cooperative Food Purchasing, Food Distribution, and Nutrition Education and Training), Driver Education and Advanced Driver Education.

The Coordinated School Health work is funded through a cooperative agreement with the Centers for Disease Control and Prevention of the U.S. Department of Health and Human Services. The Safe and Drug-Free Schools and Communities and 21st Century Community Learning Centers programs are funded through grants from the U.S. Department of Education. The School Nutrition and nutrition education and training programs are funded through grants from the U.S. Department of Agriculture, the Tobacco Prevention program is funded through a cooperative agreement with Montana Department of Public Health & Human Services, and the Driver Education and Advanced Driver Education programs are funded with state special revenue/proprietary funds.

DIVISION GOALS

The major goals of the Health Enhancement and Safety Division include:

- 1. Provide technical assistance to schools and communities in all program areas, including implementing guidance of federal program guidelines and requirements. Responsibilities include training, program planning, development, implementation, assessment, and reporting.*
- 2. Provide curricular and instructional materials to schools for use by teachers in the program areas identified. These materials include curricular scope and sequence, curricula guidelines, and classroom-based activities, as well as guidelines for program and student assessment.*

3. *Develop and maintain a cadre of regional Health Enhancement/HIV Trainers who are trained and equipped to provide health-related training to professional, administrative and support staff at the school site.*
4. *Develop and maintain a cadre of Driver Education Instructors who are trained and equipped to provide traffic-related instruction to students and advanced training to adults.*
5. *Promote a coordinated school health approach in Montana schools and increase the number of schools that provide planned, sequential and age-appropriate health and physical education at each grade level.*
6. *Monitor the availability, utilization and quality of school food services in Montana schools.*
7. *Monitor the health-related behavior of Montana youth in six categories: intentional and unintentional injury, tobacco use, drug and alcohol use, dietary imbalances, sexual behavior, and physical inactivity. The monitoring of health-related behaviors will include the general student population in grades 7 - 12, youth in alternative high school settings, American Indian youth in reservation and in urban schools, and youth with special needs.*
8. *Maintain cooperative working relationships with:*
 - *other state agencies, professional associations, state non-profit and for-profit organizations, and community-based organizations to effectively provide a continuum of services for youth to promote positive health behaviors through the most cost-effective means possible;*
 - *Montana's school administrators through frequent communication and presentations at regional and state association meetings in order to secure administrative support for program activities;*
 - *the Centers for Disease Control and Prevention, the U.S. Department of Agriculture, the U.S. Department of Education, the highway traffic safety community and the Montana Legislature to maintain existing sources of funding, provide all necessary applications and reports, and provide information and input regarding future program goals and objectives; and*
 - *other programs within the Office of Public Instruction, including communication both up and down the chain of command, in order to coordinate the effective delivery of educational services.*
9. *Conduct evaluation activities to provide information necessary to assess progress and to assist in improving division work plan activities.*

Coordinated School Health

Purpose: The intent is for the state health and education agencies to collaboratively focus efforts on developing the infrastructure within each agency that can effectively promote coordinated school health education programs.

The priorities of the program are to:

- provide support for coordinated school health education programs for Montana schools and to improve the capability of schools to provide effective, appropriate and culturally relevant school health education programs to students, and
- implement an organizational structure with the state education agency and the state health agency that will provide leadership and coordination for school health education programs that are designed to prevent health risk behaviors and health problems.

Safe and Drug-Free Schools and Communities

- Purpose:** The Safe and Drug-Free Schools and Communities (SDFSC) Act (Title IV as reauthorized by the No Child Left Behind Act of 2001) is designed to support programs to prevent violence in and around schools, and to strengthen programs that prevent illegal use of alcohol, tobacco and other drugs; that involve parents; and that are coordinated with related federal, state and community efforts. The SDFSC Act authorizes drug and alcohol prevention education, violence prevention education, comprehensive health education, professional development for school personnel, program evaluation, and limited expenses for security equipment and the hiring and mandatory training of security personnel.
- Source of Funds:** U.S. Department of Education
- OPI Subgrantees:** Local education agencies (public schools must serve as prime applicant districts; private schools may serve as participating districts). An LEA is eligible to receive funds based upon the following formula: 60% of the allocation is determined by the district's Title I Part A allocation for the previous year; 40% is based upon the district's enrollment for the prior year including the nonpublic enrollment in schools within the boundary of the LEA.
- OPI Funding & Subgrantee Funding** In 2010 Congress did not reauthorize Title IVA. The remaining carry forward dollars are funding schools that had available carry forward budgets. The ability to use this money will expire in September 2011.

21st Century Community Learning Centers

Purpose:	<p>The 21st Century Community Learning Center Act (Title IV, Part B, of ESEA as reauthorized by the No Child Left Behind Act of 2001) is designed to provide funding for after-school projects, or more appropriately "out-of-school-time" projects. Eligible applicants receive the community learning center funds through a competitive application process that demonstrates projects intended to complement students' regular academic programs, provide opportunities for academic enrichment, and offer families of participants literacy and related educational development. Awards must be \$50,000 or more and are commitments for 5 years.</p> <p>The 21st Century Community Learning Center (CLC) funds provide opportunities for activities designed to complement the students' regular academic program. Community learning centers must also offer families of these students literacy and related educational development. Successful projects provide a range of high-quality services to support student learning and development, including tutoring and mentoring, homework help, academic enrichment (such as hands-on science or technology programs) and community service opportunities, as well as music, arts, sports and cultural activities. At the same time, centers are to help working parents by providing a safe environment for students when school is not in session.</p> <p>Eligible applicants include public and private organizations that are partnered with a Montana school and propose to serve: (a) students who primarily attend schools eligible for school wide programs; or (b) schools that meet or exceed the 40% Free and Reduced Meal Count and the families of students described in (a) or (b). Priority shall also be given to applications submitted jointly by LEAs receiving funds under Title I, Part A, and community based organizations or other public or private entities.</p>
Source of Funds:	U.S. Department of Education
OPI Subgrantees:	Local education agencies, community-based organizations, and other public or private entities, and consortia.
OPI Funding:	The 2010-2011 funding level is \$5,714,213.
Subgrantee Funding:	During 2009-10, there were sixty-nine grantees. Three new entities received 2010-11 funding for a five-year grant cycle, bringing the total of Montana 21 st Century Community Learning Centers to seventy-two grantees with awards ranging from \$50,000 to \$223,945. Currently there are five programs in their tenth year, ten programs in their ninth year and seventeen in their eighth year.
Contact Persons:	Mary Ellen Earnhardt, (406) 444-0769, mearnhardt@mt.gov Amanda Domino, (406) 444-1964, adomino@mt.gov Cheri Seed, (406) 444-3000, cseed@mt.gov

Tobacco Use Prevention and Education

Purpose: The Montana Office of Public Instruction School Tobacco Use Prevention and Education program provides technical assistance and resources to Montana school districts through coordination with the Montana Department of Public Health and Human Services. The purpose of the program is to expand and strengthen the capacity of Local Education Agencies (LEA's) to prevent and reduce youth tobacco use in coordination with the Montana Tobacco Use Prevention Program.

Program priorities include:

- Policy – promote and assist Montana school districts in the adoption and implementation of comprehensive tobacco free school policies while promoting compliance of the Montana Clean Indoor Air Act
- Training – provide high quality, professional development opportunities for teachers to acquire the skills they need to help students make healthy life decisions and assist schools in meeting Montana media literacy curriculum standards
- Curriculum - assist LEA's in implementing planned, sequential, skills-based tobacco use prevention education as part of the comprehensive health enhancement curriculum
- Technical Assistance – provide technical assistance to school administrators and staff by providing on-site assistance, resources, guidance, and expertise to improve and/or enhance school tobacco use prevention and education programs
- Leadership – provide leadership to establish effective school-based tobacco use prevention education programs throughout the state
- Youth Involvement – promote youth involvement to help assure program efforts address the needs of youth
- Evaluation – assess the work plan for school-based tobacco use prevention and education at regular intervals

Source of Funds: Tobacco Master Settlement dollars awarded to the State's General Fund and provided to the OPI through a Memorandum of Understanding with the Montana Department of Public Health & Human Services.

OPI Funding: The 2010-2011 funding level is \$500,000.

Cheri Seed, (406) 444-3000, cseed@mt.gov

HIV/AIDS/STD Education

Purpose:

The program is designed to prevent the spread of HIV infection, and to expand and strengthen the capacity of local education agencies to plan, implement and evaluate the effectiveness of health education, including HIV/STD education. Program priorities are:

- Policy - Promote LEA adoption of HIV/STD policies consistent with the Centers for Disease Control (CDC) guidelines.
- Curriculum - Assist LEAs in developing, strengthening and implementing planned, sequential, skills-based comprehensive school health curricula intended to prevent behaviors that will result in HIV/STD infection. Curricula should conform to accepted practice guidelines and have credible evidence of effectiveness in impacting the behaviors that place young people at risk of HIV infection.
- Teacher Training - Provide staff development for teachers to acquire the skills they need for effectively delivering skills-based health education curriculum.
- Classroom Implementation - Work toward the effective delivery of HIV/STD curricula and the integration of HIV/STD prevention education within the context of coordinated school health education in the classroom.
- Efforts Targeting Youth in High-Risk Situations - Develop the capacity of schools, alternative schools and other agencies to provide education for preventing important health-risk behaviors among indigent youth, minority youth, youth with special education needs and other youth in high-risk situations, including staff development for those who work with youth in high-risk situations.
- Involvement of Young People - Involve youth in planning, implementing and evaluating HIV/STD prevention efforts to help assure that program efforts address the needs of youth.
- Data Collection - Conduct surveys to establish the health risk behaviors of youth, and to determine the implementation level of coordinated school health education.
- Evaluation - Assess the work plan for school-based HIV prevention education at regular intervals.

Source of Funds: Centers for Disease Control and Prevention's Division of Adolescent and School Health.

OPI Subgrantees: None

OPI Funding: The 2010-2011 funding level is approximately \$207,944. The award period does not correspond to the state fiscal year; the award period is March 1 – February 28.

Subgrantee Funding: None

Contact Persons: Susan Court, (406) 444-3178, scourt@mt.gov
Cheri Seed, (406) 444-3000, cseed@mt.gov

Health Enhancement

(Health and Physical Education)

Purpose: This program is designed to strengthen the capacity of local school district to plan, design, implement, and evaluate health and physical education (health enhancement programs). It also assists in the review and development of teacher preparation standards for Montana's units of higher education, and the review of accreditation standards at the K-12 local district level.

- Curriculum: Assist local school districts in the development, design, implementation and evaluation of health and physical education (health enhancement) curricula. This includes the development of state-model curricula and assessment materials.
- Policy: Assist local school districts in the development and adoption of school policies relating to health promotion and safety.
- Resource Materials: Assist local school districts in the implementation of health and physical education (health enhancement) curricula and programs through the development of resource materials.
- Teacher Preparation Standards: Assist and coordinate the review of Montana's Teacher Preparation Standards for the units of higher education involved in the preparation of Montana's health and physical education teachers.
- Inservice/Preservice: Promote quality health enhancement programs at the K-12 and higher education levels through inservice to local K-12 school districts, preservice programs at units of higher education for prospective teachers and through staff development for instructors of higher education.
- Accreditation Standards: Assist local school districts in the implementation of programs meeting Montana's Accreditation Standards as required by the Board of Public Education.

Youth Risk Behavior Survey

- Purpose:** The Youth Risk Behavior Survey monitors the health-related behaviors of Montana youth in six categories: intentional and unintentional injury, tobacco use, drug and alcohol use, sexual behaviors, dietary imbalances and physical inactivity. The monitoring of health risk behaviors will include the general student population in grades 7-12, youth in alternative high school settings, American Indian youth in reservation and in urban schools, and youth with special needs.
- Source of Funds:** Centers for Disease Control and Prevention, Division of Adolescent and School Health.
- OPI Subgrantees:** None
- OPI Funding:** The 2010-2011 funding level is \$48,160. The award period does not correspond to the state fiscal year; the award period is March 1 – February 28.

School Health Profiles

Purpose: The School Health Profiles (Profiles) was first implemented in 1996 to assess characteristics of and trends in health education and health policies among middle/junior high schools and senior high schools. The Profiles is conducted biennially usually in the spring semester. The Profiles is an assessment of various topics addressed in health education courses, physical education and physical activity programs, nutrition-related policies, and asthma management activities.

SCHOOL

NUTRITION

School Nutrition Programs

Organizational Structure

National School Lunch Program

Purpose: The National School Lunch Program (NSLP) is a federally assisted meal program operating in public and nonprofit private schools and residential child care institutions. It provides nutritionally balanced, low-cost or free lunches to children each school day. The program was established under the National School Lunch Act, signed by President Harry Truman in 1946.

The U.S. Department of Agriculture administers the program at the federal level. At the state level, the NSLP is administered by School Nutrition Programs, which operates the program through agreements with school food authorities.

Priorities: School meals must meet the Dietary Guidelines for Americans, which recommend that no more than 30 percent of an individual's calories come from fat, and less than 10 percent from saturated fat. Regulations also establish a standard for school lunches to provide one-third of the Recommended Dietary Allowances of protein, vitamin A, vitamin C, iron, calcium, and calories.

Children from low-income families are provided lunches free or at a reduced-price of 40 cents or less based on TANF/SNAP eligibility or according to a family size and income scale announced annually by the Secretary of Agriculture.

Source of Funds: U.S. Department of Agriculture (USDA)

OPI Subgrantees: Public or nonpublic private schools of high school grade or under and public or nonprofit private residential child care institutions may participate in the NSLP.

OPI Funding: SNP receives USDA state administrative expense funds (\$376,876 in 2010) and a minimum of \$645,934 state match funds in 2010 to administer all School Nutrition Programs, including the National School Lunch Program, School Breakfast Program, Afterschool Snack Program, Special Milk Program and the USDA Food Distribution Program.

Subgrantee Funding: Funding for school-level NSLPs comes in the form of a cash reimbursement for each meal served. The USDA determines each year, by formula set by law, the reimbursement rate for free and reduced-price lunches, as well as the general assistance subsidy for each student lunch served.

2009 - 2010	Paid Lunches	Reduced-Price Lunches	Free Lunches
Reimbursement Rates	\$.25	\$2.28	\$2.68

Contact Persons: Christine Emerson, (406) 444-2502, cemerson@mt.gov
Teresa Motlas, (406) 444-3532, tmotlas@mt.gov

School Breakfast Program

Purpose: The School Breakfast Program (SBP) is a federally assisted meal program operating in public and nonprofit private schools and residential child care institutions. It began as a pilot project in 1966, and was made permanent in 1975.

The U.S. Department of Agriculture administers the program at the federal level. At the state level, the SBP is administered by School Nutrition Programs, which operates the program through agreements with school food authorities.

Priorities: Regulations require that all school meals meet the recommendations of the Dietary Guidelines for Americans. In addition, breakfasts must provide one-fourth of the daily-recommended levels for protein, calcium, iron, vitamin A, vitamin C and calories.

Children from low-income families are provided breakfasts free or at a reduced-price of 30 cents or less based on TANF/SNAP eligibility or according to a family size and income scale announced annually by the Secretary of Agriculture.

Source of Funds: U.S. Department of Agriculture (USDA)

OPI Subgrantees: Public or nonpublic private schools of high school grade or under and public or nonprofit private residential child care institutions may participate in the SBP.

OPI Funding: SNP receives USDA state administrative expense funds and state match funds to administer all School Nutrition Programs, including the National School Lunch Program, School Breakfast Program, Afterschool Snack Program, Special Milk Program and the USDA Food Distribution Program.

Subgrantee Funding: Funding for school-level SBPs comes in the form of a cash reimbursement for each breakfast served. The USDA determines each year, by formula set by law, the reimbursement rate for free and reduced-price breakfast, as well as the general assistance subsidy for each student breakfast served.

2009 - 2010	Paid Breakfast	Reduced-Price Breakfast	Free Breakfast
Breakfast Reimbursement Rates	\$.26	\$ 1.16	\$1.46
Severe Need Reimbursement Rates	\$.26	\$1.44	\$1.74

Contact Persons: Christine Emerson, (406) 444-2502, cemerson@mt.gov
Teresa Motlas, (406) 444-3532, tmotlas@mt.gov

Afterschool Snack Program

Purpose: The National School Lunch Program (NSLP) offers cash reimbursement to help schools serve snacks to children in afterschool activities aimed at promoting the health and well being of children and youth in our communities. A school must provide children with regularly scheduled activities in an organized, structured and supervised environment; include educational or enrichment activities (e.g., mentoring or tutoring programs).

The U.S. Department of Agriculture administers the program at the federal level. At the state level, the Afterschool Snack Program is administered by School Nutrition Programs, which operates the program through agreements with school food authorities.

Priorities: Afterschool snacks can be served to all school-age children who are 18 or under at the start of the school year. To be reimbursable, each snack must include at least two different food items of the following four: a serving of fluid milk; a serving of meat or meat alternate; a serving of vegetable(s) or fruit(s) or full strength vegetable or fruit juice; a serving of whole grain or enriched bread or cereal. Examples of a reimbursable snack may include pretzels and 100 percent juice, or an apple and a carton of milk.

If the Afterschool Snack Program is "area eligible" (i.e., located in a school or in a school attendance area in which at least 50 percent of the enrolled children qualify for free or reduced-price meals), then all snacks will be reimbursed at the free rate, regardless of an individual student's eligibility. If the Afterschool Snack Program is not area eligible, snacks will be reimbursed at the free, reduced price or paid rate depending on each individual child's eligibility.

Source of Funds: U.S. Department of Agriculture (USDA)

OPI Subgrantees: In order for a school to participate, it must also participate in the NSLP and sponsor or operate an afterschool program that provides children with regularly scheduled educational or enrichment activities in a supervised environment.

OPI Funding: SNP receives USDA state administrative expense funds and state match funds to administer all School Nutrition Programs, including the National School Lunch Program, School Breakfast Program, Afterschool Snack Program, Special Milk Program and the USDA Food Distribution Program.

Subgrantee Funding: Funding for school-level Afterschool Snack Programs comes in the form of a reimbursement for each snack served. The USDA determines each year, by formula set by law, the reimbursement rate for free and reduced-price snack, as well as the general assistance subsidy for each student snack served.

2009-2010	Paid Snacks	Reduced-Price Snacks	Free Snacks
Reimbursement Rates	\$.06	\$.37	\$.74

Contact Persons: Christine Emerson, (406) 444-2502, cemerson@mt.gov
Teresa Motlas, (406) 444-3532, tmotlas@mt.gov

Special Milk Program

Program: The Special Milk Program (SMP) provides milk to children in schools who do not participate in other federal meal service programs. The program reimburses schools for the milk they serve.

The U.S. Department of Agriculture administers the program at the federal level. At the state level, the SMP is administered by School Nutrition Programs, which operates the program through agreements with school food authorities.

Priorities: Participating schools and institutions receive reimbursement from the USDA for each half-pint of milk served. They must operate milk programs on a nonprofit basis. They agree to use the federal reimbursement to reduce the selling price of milk to all children.

Source of Funds: U.S. Department of Agriculture (USDA)

OPI Subgrantees: Public or nonpublic private schools of high school grade or under and public or nonprofit private residential child care institutions may participate in the SMP.

OPI Funding: SNP receives USDA state administrative expense funds and state match funds to administer all School Nutrition Programs, including the National School Lunch Program, School Breakfast Program, Afterschool Snack Program, Special Milk Program and the USDA Food Distribution Program.

Subgrantee Funding: Funding for school-level Special Milk Programs comes in the form of cash reimbursement per half-pint of milk served to children based on the assigned rate.

2009 – 2010	Paid Milk	Free Milk
Reimbursement Rates	\$.16	Average Cost/ 1/2 Pint

Contact Persons: Christine Emerson, (406) 444-2502, cemerson@mt.gov
Teresa Motlas, (406) 444-3532, tmotlas@mt.gov

Summer Food Service Program

Purpose: The Summer Food Service Program (SFSP) helps children in lower-income areas get the nutrition they need to learn, play, and grow throughout the summer months when they are out of school. Approved sponsors are reimbursed for the meals they serve and their documented costs of running the program. All meals are served free to eligible children.

The U.S. Department of Agriculture administers the program at the federal level. At the state level, the SFSP is administered by School Nutrition Programs, which operates the program through agreements with sponsors.

Priorities: SFSPs are operated as open, enrolled, or camp sites. Open sites are in areas where 50 percent or more of the children come from families with incomes at or below 185 percent of the federal poverty level, making them eligible for free or reduced-price school meals. Meals are served free to any child at the open site. Enrolled sites provide free meals to children enrolled in an activity program at the site where at least half of the children are eligible for free and reduced-price meals. The program may also be offered in camps. However, in camps, only the meals served to eligible children may receive funding.

Source of Funds: U.S. Department of Agriculture

OPI Subgrantees: SFSP sponsors must be organizations that are fully capable of managing a food service program. Public or private nonprofit schools; units of local, municipal, county, tribal, or state government; private nonprofit organizations; public or private nonprofit camps; and public or private nonprofit universities or colleges may apply to sponsor the program.

OPI Funding: School Nutrition Programs will receive USDA state administrative expense funds (\$49,087 in 2010) to administer the program.

Subgrantee Funding: Funding for individual SFSPs comes in the form of cash reimbursement for each meal served. The USDA determines each year, by formula set by law, the reimbursement rate for free meals served and the administrative cost rate. USDA donated foods are also available to SFSP sponsors at \$.015 per meal.

2010	Breakfast	Lunch/Supper	Snack
Rural or Self-Preparation Sites	\$1.8475	\$3.2475	\$.7625

Contact Persons: Christine Emerson, (406) 444-2502, cemerson@mt.gov
Sofia Janik, (406) 444-2521, sjanik@mt.gov

USDA Food Distribution Program

Purpose:	<p>Schools participating in the National School Lunch Program (NSLP) receive commodity foods through the Food Distribution Program. The U.S. Department of Agriculture purchases the foods through direct appropriations from Congress, and under price support and surplus programs.</p> <p>The U.S. Department of Agriculture administers the program at the federal level. At the state level, the NSLP is administered by School Nutrition Programs, which operates the program through agreements with school food authorities.</p> <p>A portion of the total entitlement for Montana's Food Distribution Program is set aside for the Fresh Fruit & Vegetable Program. This program is administered through the Department of Agriculture and the Department of Defense. It allows schools that participate in the National School Lunch Program to use some of the Commodity entitlement to purchase fresh fruits and vegetables.</p>
Priorities:	<p>School districts that participate in the National School Lunch Program are to incorporate the commodity foods received into the school lunch menu on a routine basis.</p>
Source of Funds:	<p>U.S. Department of Agriculture (USDA) and Department of Defense (DOD)</p>
OPI Subgrantees:	<p>Public or nonpublic private schools of high school grade or under and public or nonprofit private residential child care institutions that operate the NSLP may participate in the Food Distribution Program.</p>
OPI Funding:	<p>SNP receives USDA state administrative expense funds and state match funds to administer all School Nutrition Programs, including the National School Lunch Program, School Breakfast Program, Afterschool Snack Program, Special Milk Program and the USDA Food Distribution Program.</p> <p>During the 2009-10 school year, School Nutrition Programs were allocated a total of \$3,341,204 for this program. Of this amount, \$335,795 was used for the Department of Defense Fresh Fruit and Vegetable Program.</p>
Subgrantee Funding:	<p>Funding in the form of government donated foods is distributed to schools based on the number of reimbursable lunches served.</p> <p>The value of commodities schools receive per meal is \$.1950 in 2009-10. School Nutrition Programs use state match money for the benefit of public schools by paying for limited processing and for the storage and delivery of the food to the respective school food authorities.</p>
Contact Persons:	<p>Christine Emerson, (406) 444-2502, cemerson@mt.gov Judy Wilson, (406) 444-4415, juwilson@mt.gov</p>

Cooperative Purchase Program

Purpose:	The Cooperative Purchase Program provides lower prices to public and nonprofit private schools and residential child care institutions participating in the National School Lunch Program (NSLP). The Program allows small schools to take advantage of substantial cost savings. The cost of each food item is the same to all participating schools regardless of size or location.
Priorities:	All food items on the bid are screened to ensure quality, nutritional integrity and student acceptability. There are no restrictions on the quantity or type of food the school can order.
Source of Funds:	User's fee.
OPI Subgrantees:	Public or nonpublic private schools of high school grade or under and public or nonprofit private residential child care institutions that operate the NSLP may participate in the Cooperative Purchase Program.
OPI Funding:	School Nutrition Programs received \$84,744 in administrative fees from the users to administer the program. During the 2009-2010 school year, the percentage charged to schools was 3.0 percent of the total cost of their food orders.
Subgrantee Funding:	N/A
Contact Persons:	Christine Emerson, (406) 444-2502, cemerson@mt.gov Kenadine Johnson, (406) 444-4412, kennie@mt.gov

Fresh Fruit and Vegetable Program

Purpose:	The Fresh Fruit and Vegetable Program (FFVP) provides all children in participating schools with a variety of free fresh fruits and vegetables between school meals. It is an effective and creative way of introducing fresh fruits and vegetables as healthy snack options. The FFVP also encourages community partnerships to support the schools when they offer free fruit and vegetables to children during the school day.
Priorities:	<p>The goals of the FFVP are:</p> <ul style="list-style-type: none">• Create healthier school environments by providing healthier food choices.• Expand the variety of fruits and vegetables children experience.• Increase children's fruit and vegetable consumption.• Make a difference in children's diets to impact their present and future health.
Source of Funds:	United States Department of Agriculture
OPI Subgrantees:	Public or nonpublic private elementary schools with greater than 50 percent of students eligible for free and reduced price school meals that operate the NSLP may participate in the FFVP.
OPI Funding:	SNP received \$41,476 (5 percent of the total state allocation of \$829,514) to administer the program during the 2010 school year.
Subgrantee Funding:	Funding for school-level FFVP comes in the form of cash reimbursement for administrative and operating expenses. A total of 42 sponsors/67 schools received a total allocation of \$788,038.26 during 2010. Funds were allocated by enrollment.

Montana Team Nutrition Program

Purpose:	<p>The Team Nutrition Program is the “nutrition education” component of the school meals program. Team Nutrition is a behavior-based, comprehensive plan for promoting school and community support for healthy eating and physical activity.</p> <p>The U.S. Department of Agriculture administers the program at the federal level. At the state level, School Nutrition Programs, Office of Public Instruction administers the Montana Team Nutrition Program. They have an interagency agreement with Montana State University-Bozeman to direct the program. Through this partnership, they are able to maximize outreach and strengthen training initiatives through collaboration with MSU Extension, education, health, and community-based stakeholders.</p>
Priorities:	<p>Team Nutrition’s goal is to improve children’s lifelong eating and physical activity habits by using the principles of the Dietary Guidelines for Americans and the USDA’s My Pyramid. Team Nutrition offers training and technical assistance on a variety of priority areas including: nutrient-rich meals and snacks, food safety, nutrition education, farm to school, healthy school award programs and student wellness.</p>
Source of Funds:	<p>United States Department of Agriculture</p>
OPI Subgrantees:	<p>The state agency partners with public and nonpublic schools (grades K-12) as well as public or nonprofit private residential child care institutions that operate the School Nutrition Programs to provide training and technical assistance to support nutrition education efforts. Team Nutrition is also a key member of state nutrition and health coalitions/committees that are active in supporting schools and communities in helping students eat right and stay physically active. Examples include Eat Right Montana, Action for Healthy Kids and community level Farm to School chapters or groups.</p>
OPI Funding:	<p>School Nutrition Programs was awarded two USDA Team Nutrition Training Grants in September 2009 and September 2010 totaling \$694,704. These grants fund the program’s personnel and activities through September 2012.</p>
Subgrantee Funding:	<p>School staff may receive training and technical assistance, curriculum resources, and the opportunity to apply for competitive mini-grant programs to support foodservice, nutrition education or student wellness initiatives.</p>

Traffic Education Program

Purpose: The program is designed to develop, administer and supervise a statewide program of instruction in high school traffic education.

- Policy: Promote and assist all Montana high school districts in offering and conducting high-quality, low-cost traffic education courses for all eligible, young, novice drivers within their geographic boundaries.
- Curriculum: Assist schools in developing, strengthening and implementing a comprehensive, sequential, skills-based traffic education program which results in injury prevention and improved risk management. Local curriculum must meet and/or exceed all state traffic education requirements and guidelines.
- Teacher Training: Provide and/or sponsor high quality pre and in-service training and education so teachers can acquire and maintain the skills they need to provide effective traffic education programming.
- Leadership: Provide the leadership to establish effective traffic education programs throughout the state.
- Technical Assistance: Provide technical assistance to administrators and instructional staff by answering daily questions about program requirements, teaching methods, instructional materials, the "Cooperative Driver Testing Program," program scheduling, vehicle procurement, budgeting, licensing, assessment and curriculum.
- Local Program Review: Conduct annual paper and periodic on-site traffic education program reviews to monitor each local program and recommend appropriate changes to enhance program effectiveness.
- Educational Materials: Develop and make available a variety of educational materials for students, parents, teachers and the public.
- State Conference: Annually co-sponsor and conduct the State Traffic Education Conference for all traffic education instructional staff statewide

Source of Funds: Funds come from a portion of driver license fees.

OPI Subgrantees: Montana public school districts are eligible to receive a per/student reimbursement provided they run an OPI-approved program. The program requirements include approved instructors, vehicles, and organization.

OPI Funding: The administration funding for 2009–2011 is an annual appropriation of \$128,147.

Subgrantee Funding: The 2009-2011 funding level is approved for \$1,000,000 annually, but dependent upon special revenue (Revenue estimates are \$800,000 - \$900,000 per year). The funding is dispersed in August following the state fiscal year.
